

MURDER/SHOOTING ANALYSIS

2013

The F.B.I Uniform Crime Reporting Program (UCR) establishes all guidelines and procedures for the submission of crime data to the State UCR Program Coordinator (State Police). Murders are counted at the time that Homicide Investigators have determined that, after investigation, an intentional killing of a human being by another has occurred. Clearances of murders occur when at least one person suspected of committing the murder is taken into police custody for prosecution. Clearance rates are determined by taking the total number of murder clearances for particular month/year and divide that number into the number of murders counted for that same month/year. **It is important to understand that UCR allows adjustments (e.g. clearances, reclassification, unfounded, etc.) from previous submitted months to be made the month that the adjustment becomes known to police.**

UCR MURDER

A Closer Look at Domestic Violence Related Murders. 2013

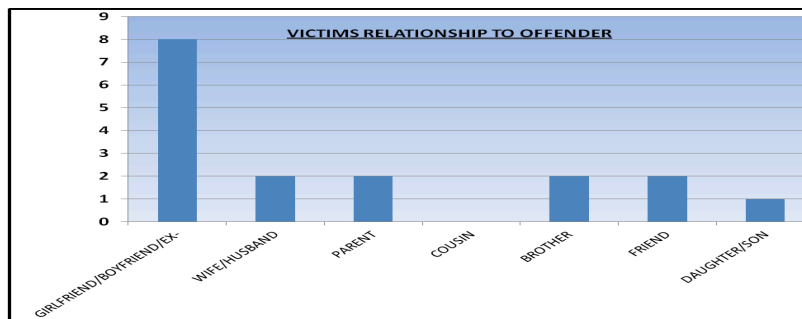

Four (4) domestic related murders occurred in apartment complexes. Apt. numbers were not inserted into INCT for all calls for police service. Therefore, we are deleting these murders from our analysis.

VICTIMS/OFFENDERS-DOMESTIC RELATED MURDERS AGE-GENDER-RACE & RELATION TO OFFENDER

Of the 131 domestic related murders during the past five (5) years, a cutting instrument (34%) was used almost as much as a firearm (38%) as the weapon of choice.

Males (67) and females (64) have been victims of domestic related murders almost equally during the past five (5) yrs.

Firearms-Weapon of Choice

*Note: Firearm type and caliber have not been identified for all murders committed by a firearm.
Based on firearm seized or evidence found at scene.*
