

Whites

killed by

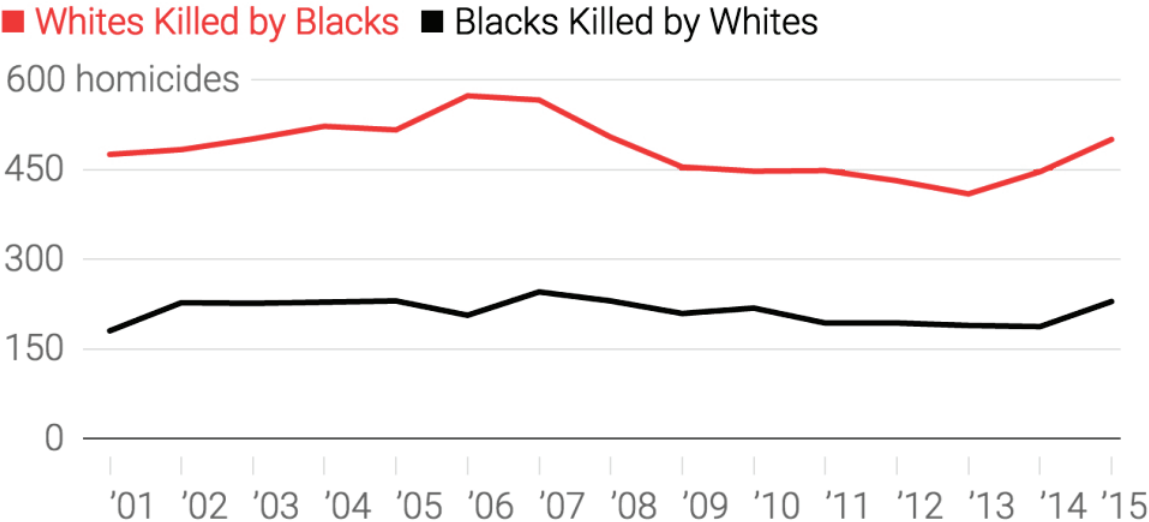

Blacks

2015

The FBI statistics show that the 500 killings of white people attributed to blacks in 2015 were up 12% from the 446 recorded in 2014. Current year's total was the highest since black perpetrators were determined to be responsible for the homicides of 504 white people nationwide in 2008. Prior to that, 2006 saw the most black-on-white killings since 2001, with 573.

On the other hand, the same source points out the 229 black lives taken by white killers last year marked an even larger leap from 2014, jumping more than 22% from the 187 black victims killed by whites that year.

Interracial Killings

Here's the main problem with this data: I was able to find only four (4) non-Hispanic white on black murders, killed by three perpetrators, for the entire year of 2014.

I compiled the largest sample of black on white homicides, occurring in 2014, that I possibly could but as far as white on black murders are concerned, it was extremely difficult to locate even a few of them. I issued a challenge to the Southern Poverty Law Center, since they seem to hype white on black crimes all the time, to find actual white on black murders, in which the "victim" was not committing a felony at the time. The SPLC did not report a single white on black murder for 2014. Instead they continuously rehashed old murders that were often decades old.

* Some victims may have been killed by someone they knew, but the media never reported the full details.

** There were numerous suspicious deaths of white females who died of drug overdoses while they were with black males. There is another case where a white female supposedly "shot herself playing Russian Roulette" with her black boyfriend. I only listed cases that were classified as murder by the authorities. I did not list cases in which a black male played an obvious role in the death, but the death was classified as accidental. There was one case of a white female being killed by a black female "ex-wife." There are also numerous cases of a white female being shot by a black male while in the company of a black boyfriend. I did not count these as "femicide."

*** Femicide related refers to victims killed by the black boyfriend of relative or close friends. Many of these victims are young children of white females dating black males. Some are women who were attacked by the black boyfriend of a white female friend.

**** I only listed cases of vehicular homicide in which the perpetrator was committing serious crimes when they killed a victim. In several cases, the perpetrator was fleeing from police. In two other cases, there is strong indication the suspect did it on purpose.
